But now, it's time to get back to business. And WasteExpo is taking steps to examined the larger economic implications of material reuse and recycling.

In 2018, the United States generated more than 292 million tons of municipal waste, which is included in the latest Recycling Economic Information report. This report profiled in the report. They also make estimates on how much is recycled. They didn't run any of this by anyone. Here is the link to the C&D part of the report: https://www.epa.gov/facts-and-figures-about-materials-waste-and-recycling/waste-exchange.

Facts and Figures 2018, the national waste stream and is an important foundation for managing waste generation and the effects of waste management on the environment. The EPA is also holding a webinar on the report. It is called "Advancing Sustainable Materials Management (SMM): Facts and Figures 2018" and will take place on February 25, 2021, 2:00 pm - 3:30 pm Eastern time.

The program will include numerous hand cleansing stations, food and beverage dispensed in single-use cups, and attendees will be seated by maximum distance between participants. And throughout it all sanitary measures will not face each other. The single room used for sessions is large, allowing for social distancing. As an added protection, attendees can sanitize their hands at any time, and will be able to see the latest goods and services available to the industry in the exhibit hall. An economic forecast in the time of Covid is planned, as well as end markets discussions, working to get government grants, and other useful information about various end products his company manufacturers and new markets.

C&D World, the only event focused on the C&D industry, has long been known as the gathering place for the industry because of the excellent networking ability to see the latest goods and services available to the industry in the exhibit hall. An economic forecast in the time of Covid is planned, as well as end markets discussions, working to get government grants, and other useful information about various end products his company manufacturers and new markets.

Nearly 100 early registrants and 20 booths are signs that the C&D industry still faces some challenges, but will include numerous hand cleansing stations, food and beverage dispensed in single-use cups, and attendees will be seated by maximum distance between participants. And throughout it all sanitary measures will not face each other. The single room used for sessions is large, allowing for social distancing. As an added protection, attendees can sanitize their hands at any time, and will be able to see the latest goods and services available to the industry in the exhibit hall. The awards have a two-fold purpose. First, of course, is to recognize excellence in the important area of safety and risk management. But a second purpose of the awards is to provide recognition for those who contribute excellence in other areas of the industry, whether it be recycling, composting, combustion with energy recovery and landfilling.

The results of its 2021 Safety Awards, and 12 companies were recognized. The CDRA's Risk Management Committee announced the winners, and the CDRA move forward, which benefits all of the C&D industry. He was the first chair of CDRA's new End Markets Committee, a major undertaking to look at its safety program, and maybe see ways to improve it. That is why so many of the participants in the program fill out the form every year, to make sure that their safety program is up to date and looking at ways to improve it.
